Field Operations

Hyperion Water Reclamation Plant

The Hyperion Water Reclamation Plant currently has three offline primary battery collector tanks, five offline final clarifiers, and an emergency final clarifier overflow offline during this period. Hyperion staff monitors all offline subdivisions.

New potential mosquito breeding sites were observed during this period due to the recent rainfall. Several flooded areas are being addressed by either pesticide treatments or water removal by Hyperion staff. Concerns regarding underground drains, primary battery D, old digester, central pipe galleries basement sump pumps and oxygen reactor areas were discussed with Hyperion staff.
